The book is divided into two parts. The first part examines the economic transformations that are taking place. These include the rise of globalization, the digital revolution, and the increasing inequality between rich and poor. The second part examines the social governance challenges that these economic changes have created. These include the rise of populism, the erosion of trust in institutions, and the increasing fragmentation of society.

The book argues that these economic and social changes are interconnected and that they are creating a new set of challenges for policymakers. The book provides a number of recommendations for how to address these challenges, including:

- Investing in education and skills training to prepare workers for the new economy
- Creating a more inclusive economy that provides opportunities for everyone to succeed
- Strengthening institutions to rebuild trust and confidence in government
- Promoting social cohesion to create a more united and just society

This book is a must-read for anyone who wants to understand the economic and social challenges facing the world today. It provides a clear and concise analysis of these changes and offers a set of practical recommendations for how to address them.
