

Unveiling the Secrets of GRE Quantitative Comparisons and Data Interpretation: A Comprehensive Guide from Manhattan Prep

The Graduate Record Examination (GRE) is a standardized test that is widely used for admission to graduate programs in the United States and other countries. The GRE consists of three sections: Verbal Reasoning, Quantitative Reasoning, and Analytical Writing. The Quantitative Reasoning section tests your skills in mathematics and problem-solving.

Two of the most challenging question types on the Quantitative Reasoning section are Quantitative Comparisons and Data Interpretation. Quantitative Comparisons questions ask you to compare two quantities, while Data Interpretation questions present you with data in a variety of formats and ask you to answer questions about the data.

GRE Quantitative Comparisons & Data Interpretation
